

Highlights

Production of bituminous coal and lignite in the week ended November 3, 1984, as estimated by the Energy Information Administration, 15,163,000 short tons. This was an increase of 664,000 short tons or 4.6 percent from production in the previous week. Production in the corresponding week of 1983 was 16,954,000 short tons. Bituminous coal and lignite production from January 1 through November 3, 1984 767,823,000 short tons, 16.3 percent above production in the same period of 1983.

Production of Pennsylvania the week · anthracite in November 3, 1984, as estimated by Information Energy Administration, was 87,000 short tons, 3,000 short tons or 3.6 percent more than production in the previous week. Production in the week of 1983 was corresponding 102,000 short tons. Anthracite production from January 1 through November 3, 1984 totaled 3,385,000 tons, 0.5 percent below short production in the same period in 1983.
